Conformity Assessment Centre

The Conformity Assessment Centre (CAC) comprises the Inspection Division and the Conformity Certification Division. The centre, established in 2005, provides professionally accredited conformity inspection and certification services to a range of sectors, both locally and internationally. CAC inspects a diversity of products and consumer goods to ensure their safety and quality, ensuring they meet national and international standards to protect the health and safety of citizens. The centre’s services enhance the competitiveness of products and reduce technical barriers to trade. Its activities play a vital role in boosting the national economy and increasing exports.

The CAC is internationally accredited by ESYD (The Hellenic Accreditation System) according to the requirements of ISO/IEC 17020:2012 and nationally accredited by JAS-AU (Jordan Accreditation System-Accreditation Unit) according to the requirements of ISO/IEC 17065:2012.

Our Services:

- Inspection as a third party on:
  - Installations and systems to assure safety and compliance with standards
  - LPG tanks and their installation, gas systems, valves and cylinders;
  - Lifting tackle and cranes.
- Product Certification for:
  - Polyethylene Pipes for Water Supply;
  - Ductile Iron Pipes;
  - Food & Hygienic Products;
  - Construction Products;
  - Agricultural Chemicals, Pesticides;
  - Other products upon request.

Inspection Division

Our Inspection Division provides inspection services according to international standard ISO 17020, such as the inspection of LPG installations and projects, gas cylinders, overhead cranes; and third-party inspection of products and goods, such as food and drugs.

Conformity Certification Division

Our Conformity Certification Division provides certification services according to the international standard ISO 17065, such as the certification of polyethylene pipes produced locally and internationally, certification of agricultural products such as pesticides and fertilizers, certification of food products and other products upon request.
